EXPERIENCE

DevOps Engineer   August 2024 – Present
QBurst Technologies   *Bangalore, IN*

- Refactored over 300 Terraform modules from version 0.12.0 to 1.8.2
- Deployed multiple platforms for clients across various industries like fashion, healthcare, e-commerce
- Created automatically scaling solutions with container orchestration while being cost optimal
- Managed and updated CI/CD pipelines on Jenkins

Software Developer Intern   Feb. 2024 – April 2024
QBurst Technologies   *Bangalore, IN*

- Trained on multiple technologies like Docker, Golang, JavaScript, Python, Bash
- Worked on mini projects during the internship period

EDUCATION

Christ University   Bangalore, IN
Bachelor of Technology in Electrical and Electronics Engineering   *2020 - 2024*

PROJECTS

Scrapify | *Go, JSON, Docker*   January 2025

- Developed a full-stack web application to scrape data from multiple Shopify storefronts
- Scrapes the data from Shopify's JSON storage, parses the data
- Uses Go's inbuilt template library to render the webpage
- Entirely uses Go's inbuilt libraries, no external dependencies
